Monster manual 5e dragons wiki guide

I'm not robot!

Monster Manual fifth edition The Monster Manual, released in 2014, is one of the top three rulebooks for Dungeons & Dragons fifth edition. It features game rules and statistics for monsters, and is primarily intended for use by the Dungeon Master. Content The Monster Manual contains statistics for over 300 monsters, various creatures (mostly
mundane animals) and NPCs. Cover As described on the book’s index page, the cover depicts the crime lord Xanathar of Waterdeep, touching the explorers deep in Undermountain. This explicitly places this event in the Forgotten Realms. On the back cover you can see a brick. According to Expedition to Undermountain (2007), Xanathar maintains a
den in the third level of Undermountain. The intruders are promptly spotted by beholderkin hidden eyepiece and reported to Xanathar. However, he prefers to avoid physical combat wherever possible. The cover is designed by Raymond Swanland. A high-resolution background of this image is available on Wizards.com. Introduction The monster
manual begins with an eight-page introduction that briefly describes how to use the monster manual, how to read statblocks, monster types and locations, various monster rules such as experience point values and resistances, and rules for legendary creatures.
